Fashion

Printed cottons and silks are used extensively for pants and long dresses.

Travelers look for packable garments to take with them and find non-wrinkle suits and drip-dry garments a boon on their long trips.

Wrap turbans for summer have become very popular. These come in handy on windy days or evenings at the resorts.

First Graders Tour Newspaper Office

On Thursday, May 10th, first grade students from Appomattox Primary School toured the TIMES-VIRGINIAN office, They were quite interested in learning a bit about just how a newspaper is made up and printed.

Shown above with a class of 28 first grade students are Mrs. Dianne Scruggs, Teacher, on the left, and Mrs. Virginia Bondurant, Teacher Aide, on the right.

Facts about the great interest rate war.

No matter what you may read about bank interest rates, keep this one clear fact in mind: **No bank anywhere is paying more than Fidelity.** And most are actually paying less than Fidelity on popular 2-year, automatically renewable 5 3/4% Certificates of Deposit. Here's why:

Fidelity compounds your interest **continuously**, not just daily. So the annual yield to you is more than 6%. It's 6.00315 to be exact.

So in the midst of all the current noise and confusion, just remember this one beautifully simple fact:

Our 6% annual yield on 5 3/4% Certificates of Deposit is bigger than their 6%.

And that **is** a fact!

1973 - Crop Soybean County Loan Rates Announced By USDA

County loan and purchase rate schedules for 1973 crop soybeans are unchanged from those in effect for 1972, it was announced today by the U. S. Department of Agriculture (USDA). The rates for the counties are based on the national average loan level of $2.25 per bushel for 1973 crop soybeans as announced Dec. 11, 1972, (See USDA Press Release 4023-72).

The premium and discount schedule is unchanged from that used in the 1972 crop program.

The national average loan level of $2.25 per bushel--unchanged from last year--is for soybeans containing 12.8 to 13 percent moisture and grading not lower than No. 2 on the factors of test weight, splits and heat damage, and No. 1 on all other factors. Support will be at the rates for the counties where soybeans are stored.

Copies of county rates will be sent to State Agricultural Stabilization and Conservation Service Offices in states where soybeans are produced. Copies may also be obtained from the Oilseeds and Special Crops Division, Agricultural Stabilization and Conservation Service. U. S. Department of Agriculture, Washington, D. C.

First Grade Students Tour Times-Virginian

Six first grade classes toured the TIMES-VIRGINIAN office on Thurs., May 10th, for a look at just how you make up and print a newspaper. Following the tour, pictures of each class were taken.

Shown above is the first grade class of Mrs. Carolyn Coleman, who can be seen on the right side of the picture. There were 28 students in her class. Mrs. Mary Moore, teacher aide, is shown on the left of the picture.

All the students seemed to enjoy their visit and it was a pleasure to have the students visit with us.

Homemaker Hints

By Rebecca M. Johnson, Extension Agent

The better care you take of your carpets and rugs, the longer they will last and keep their good looks, thus saving you money in the long run. There are three basic rules for home cleaning that will keep your carpeting in good condition.

1. Vacuum traffic areas daily. This removes tracked-in soil and restores the pile, if dirt is left on the carpet it will go below the surface and be more difficult to remove, It will also wear or break carpet fibers by abrasion.

2. Vacuum all carpeting thoroughly once a week, getting under furniture and into corners, Push the vacuum cleaner over the same area five or six times, slowly and evenly. This does not hurt rugs, but actually prolongs their life.

3. Remove any spots and stains as quickly as possible before they can dry or set. Many spots can be removed easily with a damp sponge and detergent, especially on synthetic carpets, The longer you wait before cleaning, the more likely the stain will be permanent.

Even with maximum care, your carpet will eventually tend to look dull. This doesn't mean the colors have faded -- it's caused by the gradual build-up of soil which is difficult to remove by ordinary vacuuming. When this becomes noticeable, your carpet needs shampooing. Watch next week for how to handle particular carpeting problems.
